Washington, DC 20554

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Don't you think we pay to many taxes? Every time we turn around there's another tax.

There's too much tax!!!

Some of us would like to have food or medicine, or a nice place to live, which we have to do without because of taxes.

Not everyone has a lot of money!

I would like to have a decent place to live however because everything is so expensive, I have to live in a run down rental trailer, that leaks and has mold growing on the walls and ceiling.

I am a disable vet and get really tired really fast. I have a weak heart~!

I need my phone!

Keep life for us Fair!

Sincerely,

Ronald Poland
